

Design and manufacture of agricultural machinery

"We are the market leader and our products are the top in the industry."
If you were expecting to read this, perhaps you do not know us well
enough and we have more to tell you.

Our Story

The story of our company, Petta GP, is one of passion, commitment and family tradition spanning more than five decades. It all began in 1968 when Michele Petta, with insight and entrepreneurial spirit, founded the company specializing in the design and production of agricultural machinery.

We are not satisfied with being a market leader, we prefer to tell you who we really are. Our company has grown through our family's dedication and hard work for over 50 years. We have specialized in building machines for crop protection, tilling soil and green space care, always putting quality and innovation at the center.

Since 1968, we have been working tirelessly to make our machines more and more advanced, while maintaining the excellence of Made in Italy.

Our Philosophy: Customer at the Center

We have grown up with the idea that every client deserves attention, listening and tailored solutions. That is why we have developed an approach based on three fundamental pillars:

01

Hearing:

We spend time understanding the specific needs of each client, proposing customized solutions suited to their goals.

02

Customization:

Each machine we produce is unique. We do not offer standardized products, but agricultural machinery adapted to the specific requirements of those who choose us, guaranteeing unique and high performance.

03

After Sales Support:

Our commitment does not end with the sale. We offer quality after-sales service, with a team of experts always available to solve any problems or malfunctions.

Sustainability and Environment

environmental protection is one of our key priorities. At Petta GP, we are committed to making agricultural machinery designed with a focus on environmental impact, because we firmly believe that sustainability is not just a value, but a concrete responsibility to future generations.

Our approach to sustainability is reflected in every stage of our production process. From material selection to technology optimization, every decision is driven by a desire to reduce the ecological impact of our machines. We use advanced technologies to ensure that our products are not only efficient but also operate in an environmentally friendly way, minimizing emissions and resource consumption.

Made in Italy
Quality

Since 1968, we have dedicated ourselves with commitment and passion to creating machines that combine technological innovation and traditional craftsmanship, keeping alive the value and excellence of Made in Italy. Every single machine we produce is the result of an accurate design and manufacturing process carried out entirely in Italy, respecting the high quality standards that our country represents and that distinguish us internationally.

Attention to detail, choice of materials and meticulous care at every stage of production are essential elements for us, because we believe that these are what make the difference. Our work is rooted in traditional Italian craftsmanship, but we always look to the future, constantly investing in research and development to offer cutting-edge solutions. We are artisans at heart, deeply tied to our roots, but innovators at heart, always ready to push the boundaries of technology to meet the needs of an ever-changing market.

Our products

our product range is designed to meet the specific needs of the agricultural world, with a special focus on crop protection and soil care. We offer innovative and customizable for different applications:

Weeding machines: We design efficient and precise weeding machines that enable optimal weed control, ensuring sustainable and effective work.

Spraying systems: We make high-quality spraying machines that can evenly and safely distribute phytosanitary treatments, protecting crops from pests and diseases.

Shredders: We offer high-performance solutions for shredding prunings and plant residues, ideal for the maintenance of vineyards, orchards and green spaces. Our shredders are robust, efficient and designed to ensure 'high operational reliability.

MULCHER

Discover our selection of tractor shredders, designed to offer maximum efficiency and durability. With our mulchers, you can tackle the management of pruning residues, tillage and landscaping with ease and precision

SPRAYING

Our advanced system of agricultural sprayers provides even coverage of plants, ensuring that chemicals reach every part of the vegetation. Due to the uniform distribution, these sprayers maximize the effectiveness of plant protection treatments, allowing the amount of product used to be reduced.

WEEDING

Discover our range of weeding machines designed to deliver excellent, long-lasting results in weed control. Our weed control solutions are ideal for keeping farmland, green areas and uncultivated surfaces clean, allowing you to operate with precision and efficiency.

BRUSHCUTTER

Our hydraulic brushcutters are specifically designed to meet the challenges of cleaning ditches, roadsides, embankments, hedges and green areas.

HEDGE TRIMMER

Our hydraulic hedge trimmers are designed to offer effective solutions in the care and maintenance of hedges, shrubs and landscaped areas. These versatile tools make it easy to tackle pruning and trimming, ensuring flawless results and an excellent finish.

DRIBBLE BARS

Discover the versatility of our weed control, available in both hydraulic and mechanical versions, designed to deliver high performance and unparalleled durability. Designed to adapt to all types of crops, our weed control boom ensures accurate and effective application of herbicide products, even under the most challenging conditions.

Our Vision Today

Today we are successfully expanding our production to respond more and more effectively to the needs of the market, both in Italy and abroad. This expansion is not only growth in terms of volume, but also represents our constant commitment to improving the quality of our products and optimizing our production processes.

Our philosophy is rooted in quality and excellence, principles that have always distinguished Made in Italy and that we carry forward with great pride. Through innovation and continuous adaptation to the dynamics of the global market, we strive to maintain the authenticity and value of our products, while preserving the tradition of craftsmanship that characterizes us. Every machine we produce is the result of a careful process of design, manufacture and testing to ensure that it meets the high quality standards we have set for ourselves.

Our sales network is distinguished not only by our ability to distribute our products, but also by the attention we pay to our customers at every stage of the process. We do not simply limit ourselves to sales: we offer a wide range of additional services, such as personalized advice and ongoing support, to ensure that our solutions fully meet your expectations. Regardless of where you are located, we are ready to reach out to you with professionalism and commitment, offering comprehensive service and attention to detail.

To us, every client is unique and deserves the highest level of support and attention. We are committed to ensuring that your experience with our products always lives up to your expectations, because your success is also our success. Together, we can meet the challenges of the future by building a relationship of trust and collaboration that lasts.

In this journey, we are excited to continue to grow together with you, helping to make your operations ever more efficient and productive. With our continued commitment and your trust, we are confident that we can reach new heights.

Thank you

Our history is studded with successes that we have built together with you, our valued partners and customers. Each achievement is the result of our dedication and your support, which has enabled us to grow and innovate in the agricultural machinery industry. If you are already part of our family, we sincerely thank you for the trust you place in us every day and for the continuous support that motivates us to keep improving. On the other hand, if you do not know us yet, we hope to have the opportunity to start a lasting and fruitful partnership. Our goal is to become a benchmark in the industry, offering cutting-edge solutions that meet your needs and exceed your expectations. We believe that every interaction, every piece of advice and every shared project can help build a solid and fruitful bond.

Our passion for innovation and quality drives us to constantly invest in the research and development of our machines so that they can meet the challenges of the market and the needs of farmers and professionals. We are confident that, with your input and trust, we can achieve ambitious goals and make our agricultural machines a symbol of excellence and reliability.

We look forward to embarking on this journey with you, sharing successes and facing challenges. Your satisfaction is our priority, and we are here to listen to you, answer your questions and support you every step of the way.

With gratitude and dedication,

Giuseppe e Vincenzo Petta
