

Design and manufacture of agricultural machinery

We are market leaders and our products are the best in the industry.
If you expected to read this, perhaps you don't know us well enough and we have something more to tell you.

Our history

The history of our company, Petta GP, is a story of passion, commitment, and family tradition spanning over five decades. It all began in 1968 when Michele Petta, with intuition and entrepreneurial spirit, founded the company specializing in the design and manufacture of agricultural machinery. We are not content with being market leaders; we prefer to tell you who we really are. Our company has grown thanks to the dedication of our family and the hard work we have put in over more than 50 years. We specialize in the construction of machines for crop protection, soil cultivation, and green space maintenance, always focusing on quality and innovation. Since 1968, we have worked tirelessly to make our machines increasingly advanced, maintaining the excellence of Made in Italy.

Our Philosophy: Focusing on the Customer

We grew up with the idea that every customer deserves attention, a listening ear, and tailor-made solutions. That's why we developed an approach based on three fundamental pillars:

1. **Listening:** We take the time to understand each client's specific needs, offering customized solutions tailored to their objectives.
2. **Customization:** Every machine we produce is unique. We do not offer standardized products, but agricultural machinery adapted to the specific requirements of those who choose us, guaranteeing unique and high-performance pieces.
3. **After-Sales Support:** Our commitment does not end with the sale. We offer high-quality after-sales service, with a team of experts always available to resolve any issues or malfunctions.

Sustainability & Environment

Environmental protection is one of our fundamental priorities. At Petta GP, we are committed to manufacturing agricultural machinery designed with particular attention to environmental impact, because we firmly believe that sustainability is not just a value, but a concrete responsibility towards future generations. Our approach to sustainability is reflected in every stage of our production process. From the selection of materials to the optimization of technologies, every decision is guided by the desire to reduce the ecological impact of our machines. We use advanced technologies to ensure that our products are not only efficient but also able to operate in an environmentally friendly manner, minimizing emissions and resource consumption.

Made in Italy quality

Since 1968, we have been committed and passionate about creating machines that combine technological innovation and traditional craftsmanship, keeping alive the value and excellence of Made in Italy. Every single machine we produce is the result of a careful design and manufacturing process carried out entirely in Italy, in accordance with the high quality standards that our country

represents and that distinguish us internationally.

Attention to detail, the choice of materials, and meticulous care at every stage of production are essential elements for us, because we believe that these are what make the difference.

Our work is rooted in Italian craftsmanship tradition, but we always look to the future, constantly investing in research and development to offer cutting-edge solutions. We are artisans at heart, deeply attached to our roots, but innovators in our minds, always ready to push the boundaries of technology to meet the needs of an ever-changing market.

Our products

Our product range is designed to meet the specific needs of the agricultural world, with a particular focus on crop protection and soil care. We offer innovative and customizable solutions for various applications:

1. **Weed control machines:** We design efficient and precise weed control machines that allow for optimal weed control, ensuring sustainable and effective work.
2. **Spraying systems:** We manufacture high-quality spraying machines capable of distributing plant protection products evenly and safely, protecting crops from pests and diseases.
3. **Brush cutters:** We offer high-performance solutions for shredding vine shoots and plant residues, ideal for maintaining vineyards, orchards, and green spaces. Our brush cutters are robust, efficient, and designed to ensure high operational reliability.

The details of our production

1. **SHREDDERS:** Discover our selection of tractor shredders, designed to offer maximum efficiency and durability. With our shredders, you can tackle pruning residue management, soil cultivation, and green area maintenance with ease and precision.
2. **SPRAYING:** Our advanced agricultural sprayer system guarantees uniform coverage of plants, ensuring that chemicals reach every part of the vegetation. Thanks to their even distribution, these sprayers maximize the effectiveness of plant protection treatments, allowing for a reduction in the amount of product used.
3. **WEED CONTROL:** Discover our range of weed control machines, designed to guarantee excellent, long-lasting results in weed control. Our weed control solutions are ideal for keeping agricultural land, green areas, and uncultivated surfaces clean, allowing you to work with precision and efficiency.
4. **WEEDING BARS:** Discover the versatility of our weeding bar, available in both hydraulic and mechanical versions, designed to offer high performance and unmatched durability. Designed to adapt to any type of crop, our weeding bar ensures accurate and effective application of herbicides, even in the most challenging conditions.
5. **BRUSH CUTTER:** Our hydraulic brush cutters have been specifically designed to tackle the challenges of clearing ditches, roadsides, embankments, hedges, and green areas.
6. **HEDGE TRIMMERS:** Our hydraulic hedge trimmers are designed to offer effective solutions for the care and maintenance of hedges, shrubs, and green areas. These versatile tools make pruning and trimming easy, ensuring flawless results and an excellent finish.

Our Vision Today

Today, we are successfully expanding our production to respond more effectively to the needs of both the Italian and foreign markets. This expansion is not only growth in terms of volume, but also represents our ongoing commitment to improving the quality of our products and optimizing our production processes.

Our philosophy is rooted in quality and excellence, principles that have always distinguished Italian manufacturing and which we carry forward with great pride. Through innovation and continuous adaptation to the dynamics of the global market, we are committed to maintaining the authenticity and value of our products, while preserving the artisan tradition that characterizes us. Every machine we produce is the result of a careful design, manufacturing, and testing process to ensure that it meets the high quality standards we have set for ourselves.

Our sales network stands out not only for its ability to distribute our products, but also for the attention it devotes to customers at every stage of the process. We don't just sell: we offer a wide range of additional services, such as personalized advice and ongoing support, to ensure that our solutions fully meet your expectations. No matter where you are, we are ready to assist you with professionalism and commitment, offering a comprehensive service with attention to every detail. For us, every customer is unique and deserves the highest level of support and attention. We are committed to ensuring that your experience with our products always lives up to your expectations, because your success is also our success. Together, we can face the challenges of the future, building a relationship of trust and collaboration that will last over time.

We are excited to continue growing with you on this journey, helping to make your business increasingly efficient and productive. With our constant commitment and your trust, we are confident that we can achieve new goals.

Thanks for your attention.

Our history is studded with successes that we have built together with you, our valued partners and customers. Every milestone achieved is the result of our dedication and your support, which has allowed us to grow and innovate in the agricultural machinery sector. If you are already part of our family, we sincerely thank you for the trust you place in us every day and for your continued support, which motivates us to improve more and more.

If you do not know us yet, we hope to have the opportunity to start a lasting and fruitful collaboration. Our goal is to become a benchmark in the industry, offering cutting-edge solutions that meet your needs and exceed your expectations. We are convinced that every interaction, every piece of advice, and every shared project can contribute to building a solid and fruitful relationship. Our passion for innovation and quality drives us to constantly invest in the research and development of our machines, so that they can respond to market challenges and the needs of farmers and professionals. We are confident that, with your contribution and trust, we can achieve ambitious goals and make our agricultural machines a symbol of excellence and reliability. We look forward to embarking on this journey with you, sharing successes and facing challenges. Your satisfaction is our priority, and we are here to listen to you, answer your questions, and support you every step of the way.

With gratitude and commitment,

Giuseppe e Vincenzo Petta
